Drop Box Integration

We will explain here how to connect the application to your DropBox system.

- Setting up the app on dropbox
  - Create DropBox app
  - Generate Access Token
- Setting up DropBox integration
  - Provide the generated Access Token

Setting up the app on dropbox

Setting up the app on dropbox

Create DropBox app

Login to https://www.dropbox.com/developers/

Press “Create apps”

Setting up DropBox integration

Provide the generated Access Token

Copy the Access Token from DropBox

Go to your Sadevio Portal

Maintenance -> API -> DropBox integration

Activate the integration and paste the Access Token.

Save your changes and you are ready to go.
